

About the role

Who we are

We are a small team of dedicated creatives with one thing in common - a desire to constantly exceed expectations.

Conscientious, meticulous, obsessive and open-minded, from the biggest picture to the smallest detail, we strive to channel our unending passion for creative into producing engaging and successful work.

Who are we looking for?

Have a great eye for design and love creative code? Intrigued by new development techniques and the ability to work in an agile way, creating and implementing designs that work perfectly in a multi-device world?

We're on the hunt for someone to bring a passion for design and a flair for code to the team. Someone who can quickly adapt to learning new programming techniques, understand the benefits of UX and implement beautiful UI from concept to deployment.

The core of our work covers on- and off-air disciplines, working from concept through to roll out of brand and campaign material, so being considerate to the concept and understanding how the digital elements fit into the whole is an important skill.

What will you work on?

As part of a small team, this role is a true split between design and code, working with senior members of the creative team across a wide range of creative and technical projects. From designing and building engaging rich media ads to developing entertaining microsites and user friendly front end UIs for a variety of digital products, the work will be a varied mix of creativity and technical production.

What skills/knowledge should you have?

- 2+ years experience of an agency environment or similar
- Work comfortably in Adobe CS, especially Photoshop and Illustrator
- Experience of prototyping through to final deployment of digital projects
- A good understanding of using front end languages, and able to hand code HTML5, CSS3, Javascript and JQuery
- Use of other tools such as Marvel and Sketch a bonus
- Knowledge of server-side technology a benefit, but not a necessity

**Creative Responsibilities**

- Take part in internal briefings to explore client briefs – your view point is valued and you will be expected to bring it to the table, sometimes at short notice
- Help senior team members with creative output to varying degree - from initial concepts and prototypes all the way through to final delivery
- Take direction from senior members with attention to detail, asking as many questions as is needed to fully understand the task in hand
- Take pride and responsibility for your work leaving the studio – your attention to detail is key to the professional relationships we maintain
- Clearly communicate your ideas, and present with passion and enthusiasm to the rest of your team - conveying ideas and concepts at any stage of the process is important and we'll work with you to develop this side of your skill set
- Be proactive in your development - we will work alongside you to develop your skills and we rely on you to keep us up to date with any areas where you feel you need extra support

Studio Responsibilities

- Make sure that your work is delivered on time, structuring your days according to relevant project plans
- Submit daily time-sheets to allow us to track time spent on projects
- You will be expected to be able to review your work status at any point, knowing what is complete and what is still to finish
- Make an effort to check/review projects once live to understand their impact in their natural environment (online, on-air etc.)

Personality

- A passion for learning and personal growth
- An enthusiasm for creative that is infectious
- A thirst for inspiration in all areas of design, and life
- Aware of the latest creative and digital trends and be ready to feed them into your work
- Whatever you're passionate about, keep it up and tell us about it

Application

Send a quick overview of yourself, CV and portfolio sites with examples of work to careers@mmmultiply.com, subject: Junior Digital Designer Application.
